### Mind control

[Have a look at [Electronic Medicine](#) which has been suppressed]

[REFERENCE PAGE FOR UNDERSTANDING ELECTROMAGNETIC WAVES & MIND-CONTROL by Fritz Springmeier](#)

### The band 470 - 862 MHz is allocated for television broadcasting

Intensity is expressed either as an electric (magnetic) field strength in V/m (Tesla), or as a power density, in units of Watts/cm<sup>2</sup>, according as whether near or far field conditions obtain - the former being relevant to use of a mobile phone handset use, and the latter to public exposure in the vicinity of a Base-station. Cited values are usually average ones, which in the case of the GSM duty cycle are 1/8 of the peak values. [The Physiological and Environmental Effects of Non-ionising Electromagnetic Radiation by G.J. Hyland](#)

Very low frequency (VLF) sound (20-35 KHz), or low-frequency RF modulations can cause nausea, vomiting and abdominal pains. "Some very low frequency sound generators, in certain frequency ranges, can cause the disruption of human organs and, at high power levels, can crumble masonry (18)." The CIA had a similar program in 1978 called Operation Pique, which included bouncing radio or microwave signals off the ionosphere to affect mental functions of [people in selected areas, including Eastern European nuclear installations \(19\)](#). [Non-Lethality: John B. Alexander, the Pentagon's Penguin by Armen Victorian](#)

17Hz is very close to the frequency (16Hz) at which radio-frequency /microwave radiation of sub-thermal intensities that is amplitude modulated in various ways - in particular, continuously (sinusoidally) and discontinuously (pulsed) - is reported, mainly under in vitro conditions, to cause: (i) a significant increase in loss (efflux) of calcium from brain cells, which is, however, reproducible only under certain exposure conditions [4], and which occurs even in the case of dead brain tissue; since calcium triggers release of neurotransmitters, any disturbance in the delicate balance of this chemical could well upset the integrity of the nervous (and also the immune) system; (ii) increased levels [5] of Ornithine Decarboxylase (ODC), a (rate limiting) enzyme that plays an important role in DNA replication, and possibly also in cancer promotion (see Para.9); (iii) opposing (and thus possibly stress inducing) effects [6] on the principal inhibitory and excitatory neuro-mediating brain chemicals that underpin the activity of the central nervous system. In addition, it should further be noted that the TETRA frame repetition rate is also close to the frequency at which seizures can be provoked in people suffering from photosensitive epilepsy by exposure to a light, flashing at between 15-20 times per second (see [Para.8](#)). [How Exposure to GSM & TETRA Base-station Radiation can Adversely Affect Humans by G J Hyland](#)

More disturbing is that the low frequencies that characterise the GSM/TETRA pulsing are close to those at which it is known that human mood and behaviour can be influenced in a number of ways (ranging from depression/docility to rage), depending on the kind/ frequency of modulation used [7], it being actually possible to induce sounds, and even words, intercranially by appropriate [modulations of the microwave signal \[8\]](#). [How Exposure to GSM & TETRA Base-station Radiation can](#)

## [Adversely Affect Humans by G J Hyland](#)

These researchers believe the natural resonant vibrational frequency of the skull bones (the cranium) ranges from 840 to 890 MHz in non-herzian waves. This range was reserved for VHF television, but has now been reserved for the national cellular telephone network. When the 840 to 890 range was used for television, various neurologists noted that certain signals related to particular pitches and sounds would trigger reactions in people. For instance, the NY Times 7/11/91 reported that according to a neurologist an epileptic seizure was triggered via certain television signals. Cellular phones are now being used to transmit faxes, computer information such as modems transmit, and other signals. Illuminati connected companies of IBM, Motorola, and GE are some of the companies working with cellular phone technology. The creation of vibrations via cellular phone signals in the 840 to 890 MHz non-herzian wave range could conceivably implant thoughts into a victim near the cellular phone. This raises two questions. First, IS the establishment's big push to popularize cellular phone use, even to the point of giving out free cellular phones, part of Big Brother's mind-control? Second, since it appears the brains ability to creatively think is related to the vibrations that are subtly made in the skull, the question naturally poses itself--can cranial osteopathy disrupt or alter the natural abilities of the cranium's plates to vibrate?**8: THE SCIENCE OF BODY MANIPULATION & PROGRAMMING Deeper Insights into the Illuminati Formula**

Human behaviour and reactions can be entirely controlled by using pulse modulated microwave EM radiation. Pulse modulated microwaves are useful as the carrier for the mind control signals as they are able to pass through the skull, which is rather resistant to low level EM. The massive number of microwave antennae that dot the country, some of which are used for the microwave phone network, all use pulse modulated microwaves, which makes their use for a strategic mind control device against the civilian population in times of trouble, or rioting, crucial to modifying the behaviour of the general population **MICROWAVE MIND CONTROL by Tim Rifat**

In 1977, the CIA contacted Margaret Thatcher and gave her all the details, elf frequencies, to induce cancer, paranoia (4.5 Hz), depression (6.66 Hz), manic rage (11.3 Hz) **[2001] The Secret Uses Of Microwave Mind Control By The British----Tim Rifat**

The British Government is spending 2 1/2 billion pounds on a 400 MHz pulse modulated microwave transmitter network which broadcasts 17.6 Hz into the brains of all Britain's police and anyone living near the planned 30,000 transmitters.**[2001] The TETRA System: Mass UK Mind Control Technology and the Zombification Of Britain's Police is Now A Reality by Tim Rifat**

The TETRA system pulses at 17.6 Hz broadcast at 400 MHz which is essentially the Pandora Project funded by the CIA in the late '60s and early '70s. Dr Ross Adey, the chief researcher on the Pandora Project has released a video to leading UK researchers which proves that not only does the TETRA system cause ELF zombification by massive release of calcium ions in the cerebral cortex and the nervous system, but the activated calcium ions also cause massive hormonal disturbances which lead to frenzied imbalances, emotional and physical states.....

Use of the TETRA system by the police will lead to psychotronically controlled officers who may be totally controlled in any situation and are very useful for states of economic or social chaos where extreme and violent behaviour is needed without any conscious or moral compunction - so-called police robots. **[2001] The TETRA System: Mass UK Mind Control Technology and the Zombification Of Britain's Police is Now A Reality by Tim Rifat**

Dr Adey demonstrated how a 147-megahertz (MHz) field, which at tissue level had an intensity of 0.8 milliwatts per square centimetre, caused an efflux or release of calcium ions from the irradiated brain tissue. This response only occurred when the ELF modulation of the microwave carrier-wave had an amplitude modulated at 6-20 hertz (Hz). The maximum stimulation of the neurones took place at 16 Hz, but to either side of this frequency-range parameter there was no effect.**8 [1996 Nexus] REMOTE VIEWING: THE STORY OF THE REAL X FILES By Turan Rifat**

Secondly, the police have been granted the exclusive use of the **450 MHz** microwave frequency range. This is exactly the frequency used by Dr Ross Adey, the CIA mind control expert, in his experiments on behavioural modification. It seems the police have the exclusive use of this mind control frequency and a vast array of antennae to broadcast this frequency all over the country. Very useful for mass mind control in times of emergency. Adey

found that by using  $0.75\text{mW}/\text{cm}^2$  intensity of pulse modulated microwave at a frequency of 450 MHz, it was discovered that an ELF modulation could be used to control all aspects of human behaviour. The Sussex police headquarters is connected to CCTV, closed circuit television cameras throughout the town. Some of these cameras have microwave telemetry devices that could easily be used to broadcast this frequency. The large antennae that bracket the town could also be used. **MICROWAVE MIND CONTROL by Tim Rifat**

By use of my microwave detector, I have found that mobile phones of the newer type, give off a pulse modulated microwave signal of around  $0.75\text{mW}/\text{cm}^2$  at the earpiece. This may be coincidence, but it is exactly the intensity required for behavioural control as found by Dr Ross Adey, the pioneer of microwave mind control. So in theory, an ELF signal could be added to the microwave network to feed a precise behavioural pattern into every mobile phone user in the UK. If there were widespread riots, the ability to broadcast behavioural stimuli to mollify all the mobile phone users in the country would prove useful. Since mobile phone users are generally middle class, it means authority has a useful method of controlling the behaviour of the key voters. Microwave carrier beams are perfect for transmitting the excitation potential of docility to the phone user to keep them servile in times of trouble. When no ELF signal is broadcast the phone acts in a completely different manner on behaviour in humans. In this case the microwave phones cause the neurones to release calcium ions which makes the user tired irritable and when stressed likely to emotional outbursts such as road rage. **MICROWAVE MIND CONTROL by Tim Rifat**

Waves below 6 cycles per second caused the subjects to become very emotionally upset, and even disrupted bodily functions. At 8.2 cycles, they felt very high... an elevated feeling, as though they had been in masterful meditation, learned over a period of years. Eleven to 11.3 cycles induced waves of depressed agitation leading to riotous behavior. **The Battle for Your Mind: Brainwashing Techniques Being Used On The Public By Dick Sutphen**

The average frequency of the human body during the day time is between 62 and 68 cycles each second. If it drops below this rate the immune defence system will start to shut down. Cold symptoms appear at 58 cycles, flu at 57, candida at 55, glandular fever at 52, cancer at 42 cycles each second... Dr Young and Bruce Tainio. [Cheney University. WA. USA ] <http://members.aol.com/drwhale/> <http://www.whalemedical.com/>

The Soviets used the frequencies and intensities used by mobile phones, **1800 MHz and 900 MHz, as weapons**. It is a rule of the intelligence community that you hide things in plain view, getting the public to accept microwave mind control weapons which effect their behaviour under the guise of mobile phones was a stroke of genius. Getting the public to pay for these microwave mind control devices, so their brains and behaviour can be damaged, **to make them more docile and easy to control, was pure diabolical genius.** **MICROWAVE MIND CONTROL by Tim Rifat**

My research has found that microwave weapons are targeted on middle class troublemakers and researchers who cause problems for the establishment. Russian and American research has found that pulse modulated microwaves (as used for mobile phones) can, when modulated with ELF which mimics specific brain patterns change the behaviour of the victim at the flick of a switch. It has been found that UK security police, such as MI5 use the **450 MHz** frequency used for this research (legally allowed to be used by the police) for **behavioural control**. A vast catalogue of mind control frequencies in the **MHz range**, FM radio, TV and mobile phone frequencies, have been measured, which are used in the UK for mind control and killing or disabling victims: 147, 153, 197, 199, 447, 453, 456, 466, 853, 883, 884, 887... Symptoms can be depression, befuddled thinking, loss of memory, stress, not being able to cope, manic behaviour, schizophrenia, nervous breakdowns, physical collapse, brain and nervous system damage, heart attacks, cancer.... Readings I have taken show that the 750-1000 MHz range is used by the intelligence services for inducing nervous and physical collapse. Microwave ovens give off 1000 MHz. **MICROWAVE MIND CONTROL by Tim Rifat**

The author's flat is targeted with a **900 MHz** beam which seems to be designed to cause massive neurological damage and produce tumours. **MICROWAVE MIND CONTROL by Tim Rifat**

The BT phone network has the potential to be used for docilisation of the UK public. A **30-40 MHz** signal is carried by the phone. When the earpiece is placed against the head, bone conduction carries the ELF component

into the brain of the phone user. A ELF signal which can effect behaviour or health is therefore passed into all BT phone users. It appears from experts I have consulted on the subject that the digital phones have been designed to carry this mind control carrier frequency. Vodaphone have supplied a mobile phone to a friend of mine that pumps out an **847 MHz signal at over 100 mW/cm<sup>2</sup>**, this is equivalent to 4x100 watt lightbulbs being turned on in the body of the user. This means that mobile phones can potentially be used to kill or so disable a person they no longer become a problem to the establishment. Another Vodaphone tested pumped out **50 mW/cm<sup>2</sup>**. UK safe levels for microwave ovens are **5 mW/cm<sup>2</sup>** - which are not held near the head. There are reports by military researchers [that 1 mW/cm<sup>2</sup> will cause swelling of nerve cells exposed to microwave.](#) **MICROWAVE MIND CONTROL by Tim Rifat**

On July 4th 1976 seven giant transmitters in the Ukraine, powered by the Chernobyl nuclear facility, pumped a **100 megawatt** radio frequency at the West, which contained a **10 Hz ELF mind control frequency**. According to a US scientist, Dr. Andrija Puharich, MD, the soviet pulses covered the human brain frequencies. With a Dr. Bob Beck Andrija proved that the Soviet transmissions were a weapon. He found that a **6.66 Hz frequency would cause depression and an 11 Hz signal would cause manic and riotous behaviour**. transmissions could indeed entrain the human brain, and thereby induce behavioural modification populations can be mind controlled en masse by ELF transmissions. More importantly he found that an ELF signal could cause cancer at the flick of a switch. It did this by modifying the function of the RNA transferases so that amino acid sequences are scrambled and produce unnatural proteins. **MICROWAVE MIND CONTROL by Tim Rifat**

In 1998 the International Commission designated all systems above 300 MHz as microwaves. Tetra, without argument is a Microwave Communication System, not a Radio Wave System. Microwaves behave very differently in our water-based bodies that radio waves, this is why the International Commission made this distinction....In May 2000, Sir William Stewart reported in his "Stewart Report" ..."To avoid frequencies above 16 waves a second (para. 5.59) Airwave operates at 17.6 waves a second. Accordingly adopting the EU/Stewart precautionary approach, Tetra Masts should be located as far away as possible from permanently occupied [property such as hospitals, homes and schools](#)". **TETRA: A Critical Overview into the death of Officer Neil Dring**

In quoting this research I refer to documents listed under Reference 15. So sophisticated is this research, and I refer to Operation Pandora Joint CIA/MI6 Operation since the 1960s, Operation Woodpecker USSR 1976, Operation HAARP still running in USA; they are able to define specific pulse frequencies to cause specific brain malfunctions or illnesses. For instance: 4.5: Illness Caused, 6.6: Depression/Suicide, 11: Manic behaviour/Anger, 25: Blindness if aimed at the head/Heart attack if aimed at the chest. Other consequences of frequencies used but not listed [here are hysteria, trauma, lust, murder and cancer, and may all be induced.](#) **Confidential Report on TETRA for the Police of England and Wales by B Trower**

Pulse radiation from TETRA at 17.6 Hz (waves per second) is known to interfere with our natural brains rhythm. Our brains generate their own waves within our head. One of these waves, called beta waves is on a very similar frequency to the TETRA handsets. What happens is: If you could imagine yourself jumping on a trampoline and somebody larger and heavier jumps on and dances at a slightly different speed you will bounce at their pace rather than yours. When they jump off you will still bounce at their speed. The jumping on of the person onto the trampoline is known as entrainment and this occurs when the TETRA is used in close proximity to an officer's brain. Because TETRA affects the beta rhythm of the brain it will affect what the beta rhythm is responsible for; namely sounds judgement in emergency situations. Entrainment is always followed by a phenomena called long-term potentiation. This is an analogous to the person getting

off the trampoline leaving you dancing. Long-term potentiation has been known to last several weeks after the initial source has died down. The implications for this are that the officers' brain waves would continue to suffer entrainment even after the sets have been switched off, which [would be reinforced every time the sets are switched on again.](#) **Confidential Report on TETRA for the Police of England and Wales by B Trower**

the Stewart Committee advised against using any communication instruments that pulsed above 16 waves per second. TETRA is of course 17.6 waves per second. [Confidential Report on TETRA for the Police of England and Wales by B Trower](#)
